

## DNA Profiling Process Optimization

*Our team will help you to improve your Laboratory's capacity while increasing its efficiency and effectiveness. We accomplish this through the development of strategies, optimization of processes, and implementation of change.*

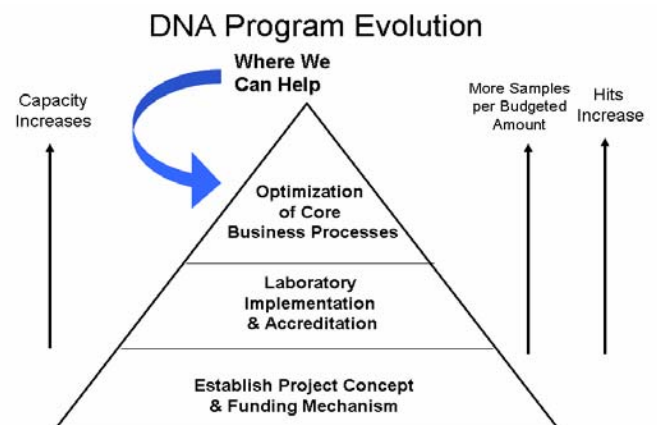

### Our Services Include:

- ◆ Needs Assessments
- ◆ Work flow Analyses and Process Mapping
- ◆ Business Process Optimization
- ◆ Resource Evaluation
- ◆ Risk Assessment and Management
- ◆ Performance Measurement & Evaluations
- ◆ Change Management

### BENEFITS:

- **Eliminate Backlogs**
- **Increase Throughput**
- **Improve Productivity**
- **Decrease Sample Processing Costs**
- **Minimize Unnecessary Re-work**
- **Effectively Monitor Laboratory Performance**
- **Increase Staff Moral**
- **Increase Customer Satisfaction**

The optimization of core business processes leads to increased capacity and cost savings.

***The cost associated with business process workflow analysis and change implementation is more than offset by the substantial benefits realized through process improvement***
